PROFILE

Senior UI/UX Designer with 15 years of experience designing SaaS platforms, mobile applications, and startup products, now expanding into AI product engineering and iOS MVP development. I design intuitive, conversion-focused interfaces — from early-stage MVPs to scalable design systems for enterprise products. AI-integrated design workflows (Claude, Figma AI, Figma Make, Stitch) cut my concept-to-prototype time by roughly 40%. Front-end literate (HTML, CSS, Tailwind, basic React) for smooth developer handoff, with growing hands-on experience in automation and AI agent workflows (n8n, vibe-coding).

SKILLS

Design & Prototyping: Figma, Figma AI, Figma Make, Framer, Webflow, Penpot, UXPressia, Miro

AI & Generative Tools: Claude, Stitch, Midjourney, Sora, Runway, ChatGPT, Adobe Firefly, Leonardo.Ai
